Washington, D.C. CRAFT today announced its certificate eligibility requirements for designated CRAFT LUX Webinars. The guidelines are intended to provide CRAFT LUX Premium Members with a clear and consistent process for earning certificates after participating in eligible professional learning sessions.

Certificates are issued exclusively to CRAFT LUX Premium Members who satisfy all attendance, survey, verification, and technical requirements. Standard Members, Basic Members, and non-members are not eligible to receive webinar certificates.

“CRAFT Webinar Certificates recognize the commitment of our Premium Members to continued learning and professional development,” said LaToya Riggins, V.P. of CRAFT. “These requirements help us maintain a fair, accurate, and reliable certification process for every eligible participant.”

Certificate Eligibility Requirements

To qualify for a CRAFT Webinar Certificate, members must meet all of the following requirements:

Premium Membership

Participants must hold an active CRAFT LUX Premium Membership at the time of the webinar.

Post-Webinar Survey Completion

Participants must submit the complete post-webinar survey. Every required question must be answered; incomplete or partially submitted surveys will not qualify.

Certificate-Eligible Webinars

Certificates are available only for designated CRAFT LUX Webinars. An eligible event will be clearly identified as "Certificate Eligible" in its event description, registration information, or promotional materials. Attendance at a webinar that does not carry this designation will not result in a certificate.

Attendance and Survey Verification

The CRAFT Team will verify each participant's attendance record and completed survey. After successful verification, certificates will be issued within 30 business days and delivered digitally through the CRAFT Member Portal [\[https://live.vcita.com/site/betterfutures\]](https://live.vcita.com/site/betterfutures)

Registered Attendee Requirement

Certificates are issued only to the individual registered for and attending the webinar. Certificates cannot be transferred, reassigned to another individual, or issued retroactively.

Attendance-Tracking Technology

Participants must join the webinar using a device and platform that support accurate attendance tracking, including Zoom, a compatible web browser, or the CRAFT+ App. Participants are responsible for maintaining a reliable connection. Technical or connectivity issues that prevent CRAFT from accurately confirming attendance may affect certificate eligibility.

CRAFT encourages all participants seeking certification to confirm their Premium Membership status, join on time using their registered account, remain connected throughout the webinar, and complete the post-webinar survey in full.

We invite early learning leaders, educators and Associations to explore CRAFT and experience firsthand the impact of this groundbreaking platform. For more information and to access CRAFT+, visit [\[betterfuturesdc.com/gettheapp\]](https://betterfuturesdc.com/gettheapp).
